Driver Development

American Spirit Racing History

American Spirit Racing was formed in 1987 and has campaigned race-winning cars and drivers in the IMSA Firestone Firehawk Series, IMSA Camel GT (GTP), Trans Am, American Le Mans (LMP1 & LMP2), and Indy Lights. Winning such prestigious races as the Mobil1 12 hours of Sebring.

American Spirit Racing Driver Development Program

American Spirit Racing returns to action in 2027 with a special Driver Development Program preparing young drivers starting out and more seasoned drivers in auto racing to learn all the proper race-winning techniques, get better and faster.

The program will operate in the ideal learning ground for drivers coming out of karting or track days / club racing.

The American Spirit Racing Driver Development Program is designed to provide its drivers with all the tools to succeed in the sport as they rise up the motorsport ladder. The program is designed to keep costs low for our drivers in a safe but very competitive environment. The program is limited to two drivers to keep 100% of the focus on driver development and winning races.

This includes proper instruction on all the basics, learning car set ups, vehicle dynamics, tire management, passing techniques, sponsor management and much more.

The Goal

Our goal is to take you from the amateur level to the pro level.

Whether you want to turn Pro or just want to compete on that level, our program is designed to give you all the experience to make it there.

We also offer multi-year programs that will boost you to advancing even more.

Why Arrive & Drive?

- Takes away the upfront cost of buying a car
- Takes away the costs and hassle of maintaining, transporting and crewing the car
- We handle everything. You just concentrate on driving and improving

Why American Spirit Racing?

Learn from an organization with race-winning experience at the highest levels of North American Sports Car and Open-Wheel racing.

Of course, if you already own a car or you want to buy one, we can offer you the same Driver Development Program as a full arrive & drive using your own car for a reduced price.

Performance

- 147 wheel hp, 1,325 lbs with driver
- 1,000cc inline 4 engine, 11,800 rpm
- 6 speed paddle shift sequential gearbox
- Adjustable limited slip differential
- 2 way adjustable shock absorbers
- 4 pot billet calipers, 274mm rotors

ICONS OF THE TRACK

Large Fields

In 2026 fields averaged 50 cars at each event.

Therefore, no matter what level at which you begin, there is always someone you will be racing against.

This is the perfect venue for young drivers to learn car control and race craft.
